Professional Summary

Full Stack Developer with 1 year of professional experience building scalable web applications, interactive user experiences, and real-time engagement platforms using React.js, Next.js, Lit.js, Node.js, PostgreSQL, and Redis. Experienced in frontend engineering, API integrations, caching systems, and modern SaaS application development with growing expertise in backend systems and scalable architectures.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, SQL
Frontend: React.js, Next.js, Lit.js, Tailwind, Redux, Zustand, HTML, CSS, Construct 2/3, ShadCN UI
Backend: Node.js, Express.js, Django, REST APIs, JWT Authentication, Socket.io, BullMQ
Database & Cloud: PostgreSQL, MongoDB, Prisma ORM, Redis, AWS EC2, AWS S3
DevOps & Tools: Docker, Git, GitHub, CI/CD, Postman, Vercel, Render
Concepts: Real-Time Systems, API Integrations, Caching, SaaS Architecture, System Design

Professional Experience

LiveLike Sports Technologies

Assistant Software Developer (Web)

Jul 2025 – Present

Software Developer Intern

Feb 2025 – Jul 2025

- Engineered interactive sports engagement experiences using React.js and Lit.js supporting real-time audience participation workflows for live events with 5k+ concurrent users.
- Developed reusable frontend components, scalable UI workflows, and platform integrations for sports engagement products and interactive experiences.
- Optimized sports data workflows by incorporating SDAPI/OPTA services along with Redis caching and CDN strategies to reduce API load and improve platform performance.
- Collaborated with engineering, QA, and product teams in agile development environments to deliver scalable production-ready features and engagement experiences.

Full Stack Developer Intern | Zeepty

May 2024 – Jul 2024

- Created responsive and optimized frontend interfaces using Next.js, React.js, and Tailwind CSS for scalable web platform experiences.
- Integrated REST APIs, authentication workflows, and reusable UI components while improving frontend responsiveness and performance.
- Partnered with cross-functional teams on feature implementation, debugging, UI optimization, and scalable user experience enhancements.

Projects

StreamSync | Next.js, Socket.io, Redis Pub/Sub, PostgreSQL

- Developed a real-time event engagement platform enabling live chats, polls, reactions, leaderboards, and synchronized multi-user interactions.
- Implemented scalable WebSocket architecture, Redis Pub/Sub integration, and real-time analytics systems for high-performance event synchronization workflows.

DevFlow AI | Next.js, Node.js, PostgreSQL, Redis, Socket.io

- Built an AI-powered developer collaboration platform featuring real-time sprint management, AI task generation, GitHub-integrated workflows, and collaborative Kanban boards.
- Implemented scalable backend APIs, Prisma ORM workflows, Redis caching, role-based workspace management, and real-time collaboration systems using Socket.io.

APIFlow | Node.js, PostgreSQL, Redis, BullMQ, Socket.io

- Architected a scalable API monitoring and observability platform featuring real-time analytics dashboards, distributed monitoring workers, uptime tracking, and automated incident alerting.
- Engineered Redis-backed queue systems, cron-based monitoring services, and WebSocket-driven analytics workflows for scalable observability infrastructure.

Education

Netaji Subhas University of Technology (NSUT), Delhi

Bachelor of Technology in Computer Science & Engineering

2021 – 2025

CGPA: 7.05

Leadership & Responsibilities

Training & Placement Coordinator | NSUT

Aug 2023 – May 2025

- Coordinated student-company engagement, recruitment workflows, placement drives, and communication processes with HR teams and recruiters.
- Managed placement operations, student databases, reporting workflows, and portal coordination using Excel, SQL, and collaborative management tools.
